The Government Wireless and Technology Communications Association (GWTCA) and Radio Club of America (RCA) Announce Industry Collaboration

April 22, 2020

The Government Wireless and Technology Communications Association (GWTCA) and the Radio Club of America (RCA) have announced a new industry collaboration. Both organizations have a focus on education and training to assist those in the wireless industry advance their careers. GWTCA and RCA will work together on education and training initiatives. They will also offer joint discounts on membership and do mutual on-line promotion.

GWTCA President Andrew Maxymillian said “The vision and the goals of both of our organizations are completely aligned: to improve the visibility of wireless as a career for youth and women, and to create more educational opportunities for those already in the wireless industry. GWTCA is uniquely positioned to help the interests of wireless as used by government, transportation, utilities, public safety, and business entities.”

RCA President Carroll Hollingsworth remarked that “Like RCA, GWTCA is a broadly based wireless organization, and both organizations have the ability to help fix the increasing void of new entrants into the wireless industry. RCA has been doing this with our thirty plus years of working with youth to get them interested in STEM (science, technology, engineering, and mathematics) subjects, and with our long-term focus on encouraging more women into wireless. With our new partnership with GWTCA we can both do even more for the wireless industry.”

About the Government Wireless and Technology Communications Association
The Government Wireless Technology & Communications Association focuses on public transit and other public service wireless technology and communications users, to be their voice and focus on solutions for their unique needs.

GWTC\(A\) advocates for policies of importance to our members and to promote the advancement of wireless technology and communications as an effective means for public transit, other public service and public safety agencies to complete their missions. Our Board is as diverse as our membership, including representatives of municipalities, manufacturers, consultants, and educators. Their interests are broad as well, from traditional land mobile radio to cyber security, from smart cities to IP. Visit https://gwtca.org/ for more information.

About RCA

Founded in 1909, the Radio Club of America is the oldest, most prestigious group of wireless communications professionals in the world. Members are dedicated to the wireless art and science for the betterment of society. The Radio Club of America is a 501(c)(3) non-profit organization.
